

**This manual has important safety warnings and operating information.
Please read before using the unit and save for future reference.**

The **Ona BREEZE** will Odor Neutralize a room up to 1500 sq ft (140 sq m.). Ona's 4L Gel will last from 4 – 6 weeks, depending on temperature, humidity and the airflow setting of the unit.

OPERATING INSTRUCTIONS

1. Operate the BREEZE on a level surface only. This will prevent backwash. Remove lid or 4 litre (1 gal) pail of Ona Gel. Place Breeze unit over top of pail, so that it is centered over the gel. There are two sets of tabs on each leg so it can fit two different types of containers.
2. Plug the BREEZE into 115VAC/60Hz outlet and switch "High"(H) for maximum airflow to start.
3. The flow can be controlled by switching from High (H) to Low (L) output. The Airflow Control switch is located at the front of the Unit. The maximum Airflow is approx. 45 cubic feet per minute (CFM).
4. When the GEL is reduced to within one inch of the bottom of the pail, replace the GEL Pail.

SAFETY INFORMATION

The BREEZE is designed to operate on ordinary household 110/120 volt, 60 Hertz alternating current with an adapter (included) that supplies the breeze with 12VDC.

- Never put the BREEZE into standing water due to shock hazard.
- Do not use any type of corrosive liquids.
- Always operate the BREEZE in a horizontal position to prevent spillage and immersion of motor.
- Connect the power supply to an appropriate power source. Be sure that all electrical cords and extensions are of adequate size and properly insulated.
- Never allow the bottom of the unit to become plugged with paper or other loose materials.
- Never place the BREEZE on dust, sand, or loose paper. Materials may become drawn up into the air intake while operating causing extreme damage to the motor.
- Never attempt any servicing or cleaning on the BREEZE while it is plugged into electrical current. This may result in shock or injury.
- Never probe the fan with wire or other instruments while the unit is operating.

MAINTENANCE

- The unit should be kept clean.
- Verify the level of GEL in the 4 L pail every week.

SPECIFICATIONS

Ona is produced by:

Odorchem Manufacturing Corp.

Unit 404, 20285 Stewart Cres., Maple Ridge, B.C. V2X 8G1

Tel: (604) 342-7881 Fax: (604) 608-2981 email: odorchem@odorchem.com

Weight	2.2 kgs (5 lbs)
Ship weight	2.6 kgs (5.2 lbs)
Capacity of pail	4 Liters (1 gallon)
Output	Approx. 45 Cubic feet per minute
Power consumption	Up to 15 watts
Power	115 Volts
Cycle	60 Hertz

ODOR NEUTRALIZATION

BREEZE is to be used ONLY with Ona products. Ona's products do not merely mask odors but bonds with the offending molecules rendering them odorless. Ona's products neutralize a wide spectrum of odors. Ona is safe and biodegradable, designed for use in any environment.

TO BE USED WITH ONA GEL.

All the Ona products are scientifically engineered to be completely non-toxic and environmentally safe. They have proven to effectively neutralize virtually any odor permanently.
